SHUBHAM FARERA

Senior Backend Software Engineer | Java | Spring Boot | Microservices | Distributed Systems

Pune, India, 411021 • +91 9584368070 • shubham.farera@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Backend Software Engineer with 8+ years of experience developing enterprise applications using Java, Spring Boot, REST APIs, and microservices. Experienced in asynchronous processing with Apache Kafka, relational database optimization, production reliability, and software design across healthcare, finance, and logistics domains.

TECHNICAL SKILLS

Languages & Backend:	Java (8 / 11 / 17), SQL, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs
Messaging & Databases:	Apache Kafka, MySQL, Oracle, Elasticsearch, Redis
Testing & DevOps:	JUnit, Mockito, SonarQube, CodeQL, Git, Docker, Jenkins CI/CD, Maven
Architecture & Cloud:	Microservices Architecture, Event-Driven Architecture, SOLID Principles, Azure (AZ-900)

PROFESSIONAL EXPERIENCE

IT Analyst (Senior Backend Engineer) — Tata Consultancy Services
Oct 2023 – Present

- Developed Java 17 and Spring Boot microservices supporting healthcare claims processing and policy underwriting workflows with high availability.
- Implemented Kafka producers and consumers for asynchronous service communication with schema validation, serialization, and error recovery.
- Contributed to distributed workflow implementation across billing and policy services using Kafka event-driven messaging and retry handling.
- Optimized Elasticsearch queries, index mappings, and analyzer configurations for policy lookup, improving response times from ~450ms to sub-150ms.
- Optimized relational database queries, table indexing, and supported MySQL/Oracle primary-replica configurations with Redis caching.

Application Development Senior Analyst — Accenture
Sept 2021 – Aug 2023

- Developed backend RESTful microservices for automated portfolio rebalancing within a wealth management platform supporting $500M+ in AUM.
- Engineered secure, idempotent REST APIs to integrate internal workflows with external banking gateways and financial settlement networks.
- Optimized Spring Data JPA queries and database indexing for batch settlement processing, reducing execution times by ~35%.

Software Engineer Progression (Analyst & Associate) — Accenture
Feb 2018 – Aug 2021

- Developed REST APIs (Java, Spring Boot, JPA) for an order tracking platform handling up to 200K+ daily orders; applied State/Strategy patterns.
- Developed core Java batch utilities for public assistance case management; authored JUnit/Mockito test suites achieving reliable coverage.

EDUCATION

Bachelor of Engineering (B.E.) in Information Technology
SGSITS Indore (2013 – 2017) | **CGPA: 7.1 / 10.0**

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900)
Microsoft • Certified, 2023
