SHUBHAM FARERA

Senior Java Backend Developer | Java | Spring Boot | REST APIs | Microservices | SQL

Pune, India, 411021 • +91 9584368070 • shubham.farera@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Java Backend Developer with 8+ years of experience in enterprise software development using Java, Spring Boot, REST APIs, and relational databases. Experienced in backend application development, API integration, debugging, testing, and maintenance across enterprise projects. Familiar with microservices architecture and modern backend design principles, with ongoing hands-on learning in system design and distributed systems.

TECHNICAL SKILLS

PROFESSIONAL TECHNICAL SKILLS (PRODUCTION EXPERIENCE)

Core Java & Fundamentals: Java 8 / 11 / 17, Object-Oriented Programming (OOP), Collections Framework, Streams API, Exception Handling, Multithreading

Backend & Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST API Development, Dependency Injection, Transaction Management

Databases & Caching: SQL, Relational Databases (MySQL, Oracle), Redis

Testing & Code Quality: JUnit, Mockito, Unit Testing, Debugging & Troubleshooting, SonarQube

DevOps & Infrastructure: Kubernetes, NGINX Ingress, Docker, Git, Maven, Jenkins CI/CD

ADDITIONAL TECHNICAL KNOWLEDGE (ONGOING SELF-STUDY & HANDS-ON PRACTICE)

Distributed Systems & Design: Apache Kafka, Elasticsearch, Microservices Architecture, Distributed Systems Concepts, High-Level Design (HLD) & Low-Level Design (LLD)

PROFESSIONAL EXPERIENCE

IT Analyst (Senior Backend Engineer) — Tata Consultancy Services Oct 2023 – Present

- Developed and maintained Java and Spring Boot backend services supporting enterprise business workflows.
- Implemented REST APIs for application features, including request validation, exception handling, and database integration.
- Worked with Spring Data JPA and Hibernate for database operations, and integrated Redis caching to reduce repetitive query load on relational data.
- Deployed containerized backend services to Kubernetes clusters, configuring NGINX Ingress routing rules, endpoints, and health check probes.
- Investigated application defects and resolved backend issues through debugging, log analysis, and code fixes.
- Developed unit tests using JUnit and Mockito to validate business logic, and participated in Agile development, code reviews, and releases.

Application Development Senior Analyst — Accenture Sept 2021 – Aug 2023

- Developed backend RESTful services using Java and Spring Boot to support wealth management business workflows.
- Implemented and integrated REST APIs with internal backend modules and external financial service gateways.
- Wrote and maintained database queries and entity mappings using Spring Data JPA and Hibernate for data processing.
- Participated in peer code reviews, sprint planning, and Agile delivery ceremonies to maintain code quality standards.

PROFESSIONAL EXPERIENCE (CONTINUED)

Application Development Analyst — Accenture — May 2020 – Aug 2021

- Developed backend REST APIs using Java, Spring Boot, and Spring Data JPA for order processing and tracking workflows.
- Implemented business logic, request validation, and exception handling to ensure robust API behavior.
- Maintained relational database interactions and resolved backend defects identified during QA testing cycles.
- Collaborated with cross-functional teams in daily standups and sprint retrospectives to deliver scheduled features.

Associate Software Engineer — Accenture — Feb 2018 – Apr 2020

- Developed core Java application modules and scheduled batch processing jobs for public assistance case management systems.
- Authored automated unit tests using JUnit and Mockito to validate business logic and improve test coverage.
- Investigated defect tickets, performed debugging and root cause analysis, and deployed code fixes within SLA timelines.
- Collaborated with senior developers on requirements analysis and technical documentation.

SELECTED HANDS-ON PROJECTS

Parking Lot System | Java, Spring Boot, REST APIs, Object-Oriented Design — github.com/sfarera

- Implemented low-level object-oriented design applying Creational and Behavioral design patterns (Factory, Strategy) to manage parking spots, vehicle types, and dynamic fee calculation strategies.
- Developed REST APIs to handle parking ticket issuance, vehicle check-in/checkout workflows, and real-time slot availability tracking.

Movie Ticket Booking System | Java, Spring Boot, JPA, Transaction Management — github.com/sfarera

- Engineered a booking service with relational data modeling, handling concurrent seat reservations, show scheduling, and pricing tiers.
- Utilized Spring transaction management (@Transactional) and database locking mechanisms to prevent double-booking and maintain transactional integrity.

Expense Sharing Application | Java, Spring Boot, Object-Oriented Design — github.com/sfarera

- Modeled split-expense domain logic supporting multiple split strategies (equal, exact amounts, percentage) among user groups.
- Exposed RESTful endpoints for group management, expense creation, and calculating consolidated balances to minimize settlement transactions.

EDUCATION

Bachelor of Engineering (B.E.) in Information Technology — 2013 – 2017

Shri Govindram Seksaria Institute of Technology and Science (SGSITS Indore) — **CGPA: 7.1 / 10.0**

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) — Certified, 2023

Microsoft • Cloud Concepts, Azure Architecture, Security & Governance
