SHUBHAM FARERA

Senior Backend Software Engineer | Java | Spring Boot | Microservices | Distributed Systems

Pune, India, 411021 • +91 9584368070 • shubham.farera@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Backend Software Engineer with 8+ years of experience developing enterprise applications using Java, Spring Boot, REST APIs, and microservices. Experienced in asynchronous processing with Apache Kafka, relational database optimization, production reliability, and software design across healthcare, finance, and logistics domains.

TECHNICAL SKILLS

Languages:	Java (8 / 11 / 17), SQL
Backend Frameworks:	Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs
Messaging & Streaming:	Apache Kafka
Databases & Search:	MySQL, Oracle, Elasticsearch, Redis
Testing & Quality:	JUnit, Mockito, SonarQube, CodeQL Static Analysis
DevOps & Tools:	Git, Docker, Jenkins CI/CD Pipelines, Maven
Architecture & Design:	Microservices Architecture, Event-Driven Architecture, SOLID Principles, Design Patterns
Cloud:	Microsoft Azure (AZ-900 Certified)

PROFESSIONAL EXPERIENCE

IT Analyst (Senior Backend Engineer) — Tata Consultancy Services

Oct 2023 – Present

- Developed Java 17 and Spring Boot microservices supporting healthcare claims processing and policy underwriting workflows, ensuring high system availability and reliable error recovery.
- Developed Kafka producers and consumers for asynchronous communication between backend services, implementing schema validation, message serialization, and dead-letter queue error handling.
- Contributed to distributed workflow implementation across billing and policy services using Kafka event-driven messaging and compensatory retry handling.
- Optimized Elasticsearch queries, index mappings, and analyzer configurations for policy lookup, improving search response times from ~450ms to sub-150ms.
- Optimized relational database queries, table indexing, and supported MySQL/Oracle primary-replica configurations with Redis caching to reduce query latency and database load.
- Integrated Jenkins CI/CD deployment pipelines with automated CodeQL static analysis and SonarQube quality gates to enforce code quality standards and prevent defect escapes.

Application Development Senior Analyst — Accenture

Sept 2021 – Aug 2023

- Developed backend RESTful microservices for automated portfolio rebalancing workflows within a wealth management platform supporting over $500M in assets under management (AUM).
- Engineered secure, idempotent REST APIs to integrate internal portfolio workflows with external banking gateways and third-party financial settlement networks.
- Optimized Spring Data JPA queries, database indexing, and Hibernate configurations for end-of-day batch settlement processing, reducing execution times by ~35%.
- Mentored junior engineers through technical design discussions and peer code reviews, helping improve code quality and maintainability.

PROFESSIONAL EXPERIENCE (CONTINUED)

Application Development Analyst — Accenture — May 2020 – Aug 2021

- Developed backend REST APIs using Java, Spring Boot, and Spring Data JPA for an order processing and shipment tracking platform handling up to 200K+ daily orders.
- Implemented State and Strategy design patterns to manage multi-stage shipment lifecycles, ensuring clean status transitions and business rule validation.
- Optimized database queries and HikariCP connection pool configurations, reducing API latency during peak shipment processing windows.
- Integrated third-party carrier tracking webhooks and asynchronous status notification handlers to ensure reliable end-to-end shipment visibility.

Associate Software Engineer — Accenture — Feb 2018 – Apr 2020

- Developed core Java application modules, data transformation utilities, and scheduled batch jobs supporting public assistance case management systems.
- Authored automated unit and integration tests using JUnit and Mockito, ensuring reliable test coverage and resolving production defect tickets ahead of SLA deadlines.
- Collaborated with cross-functional teams in an Agile environment to participate in sprint planning, backlog grooming, and root cause analysis (RCA) for client-reported issues.
- Authored data migration utilities and SQL batch scripts to support database transformation tasks across client staging environments.

TECHNICAL OWNERSHIP & ENGINEERING PRACTICES

- **Code Craftsmanship & Standards:** Conducted comprehensive Low-Level Design (LLD) reviews and peer pull-request evaluations, enforcing clean architecture, SOLID design principles, and automated SonarQube quality gates across releases.
- **Engineering Mentorship & Onboarding:** Mentored junior and mid-level software engineers on Java concurrency best practices, Spring Boot service decomposition, unit test writing with JUnit/Mockito, and defensive coding techniques.
- **API Design & Contract Governance:** Collaborated closely with frontend engineers, product managers, and QA teams to establish standardized RESTful API contracts, predictable error response payloads, and pagination models across microservices.
- **Production Reliability & Incident Management:** Participated in on-call engineering rotations, triaged high-priority production defects, and conducted blameless Root Cause Analysis (RCA) meetings to implement preventative engineering measures.

EDUCATION

Bachelor of Engineering (B.E.) in Information Technology — 2013 – 2017

Shri Govindram Seksaria Institute of Technology and Science (SGSITS Indore, MP) — **CGPA: 7.1 / 10.0**

Key Academic Foundations: Data Structures & Algorithms, Object-Oriented Analysis & Design (OOAD), Database Management Systems (DBMS), Operating Systems, Computer Networks, Software Engineering.

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) — Certified, 2023

Microsoft • Cloud Concepts, Azure Architecture, Security, Governance & Compliance

Verified foundational proficiency in Cloud Architecture, Azure Core Services (Compute, Storage, Networking), Identity, and Security.
