Education

• Shri Govindram Seksaria Institute of Technology and Science (SGSITS) **Indore, Madhya Pradesh, India**
Bachelor of Engineering in Information Technology | GPA: 7.10/10 *July 2013 – June 2017*

Skills Summary

- **• Languages :** Java (8 / 11 / 17), SQL
- **• Backend Frameworks :** Spring Boot, Spring MVC, Spring Data JPA, Hibernate, RESTful APIs, Microservices
- **• Databases & Caching :** MySQL, Oracle DB, PostgreSQL, Redis (In-Memory Caching & Session Management)
- **• Cloud & DevOps :** Kubernetes, NGINX Ingress, Docker Containers, Jenkins CI/CD, Git, Maven, Microsoft Azure (AZ-900)
- **• Testing & Quality :** JUnit 5, Mockito, SonarQube, Unit & Integration Testing, Application Debugging & Profiling
- **• Core Engineering :** Object-Oriented Design (OOD), Design Patterns, Low-Level & High-Level System Design, REST API Standards

Work Experience

• Tata Consultancy Services — Software Development (Backend) **Pune, India**
IT Analyst (Senior Backend Engineer) *Oct 2023 – Present*

- Developed and maintained enterprise backend microservices using Java 17 and Spring Boot, handling high-volume transaction processing workflows.
- Engineered secure RESTful APIs implementing request payload validation, consistent HTTP status mapping, and structured centralized error handling.
- Configured Spring Data JPA and Hibernate for database persistence; integrated Redis caching for frequently accessed data to reduce database load.
- Managed containerized microservice deployments on Kubernetes clusters; configured NGINX Ingress routing rules, endpoints, and health probes.
- Authored comprehensive JUnit and Mockito test suites, participated in peer code reviews, and conducted production defect triage using log analysis.

• Accenture — Software Development (Backend) **Pune, India**
Application Development Senior Analyst *Sept 2021 – Aug 2023*

- Engineered backend RESTful services using Java and Spring Boot for wealth management domain applications, supporting client portfolio processing.
- Integrated secure REST APIs with external financial gateways and internal banking services, implementing authentication and payload validation.
- Designed relational database schemas, optimized complex SQL queries, and configured Hibernate entity mappings to streamline transaction processing.
- Collaborated in an Agile Scrum environment, conducting peer code reviews, sprint planning, and backlog grooming to maintain software quality.

Application Development Analyst *May 2020 – Aug 2021*

- Developed backend REST APIs using Java, Spring Boot, and JPA for order processing workflows with validation, logging, and error handling.
- Maintained relational database interactions, tuned SQL queries, and resolved backend defects identified during functional QA testing cycles.

Associate Software Engineer *Feb 2018 – Apr 2020*

- Developed core Java application modules and scheduled batch processing jobs for public assistance case management systems.
- Authored automated unit tests with JUnit and Mockito to validate business logic and maintain regression test coverage across CI pipelines.

Projects and Technical Systems

• Parking Lot System — Object-Oriented Design & Backend Service ***github.com/sfarera***
Java, Spring Boot, REST APIs, Design Patterns (Factory, Strategy)

- Implemented low-level design using Factory and Strategy patterns for parking spot allocation and dynamic fee calculation; exposed REST APIs for check-in/out and atomic spot reservations.

• Movie Ticket Booking System — Transaction Management & Booking Service ***github.com/sfarera***
Java, Spring Boot, JPA, Concurrency & Seat Locking (@Transactional)

- Engineered booking service with concurrency handling and transactional seat locking (@Transactional) to eliminate double-booking; implemented catalog browsing and checkout workflows.

• Expense Sharing Application — Domain Modeling & Split Engine ***github.com/sfarera***
Java, Spring Boot, REST APIs, Domain Modeling, Debt Simplification

- Modeled split-expense domain logic supporting multiple split strategies (equal, exact, percentage); designed debt simplification graph logic to compute minimal net cash settlements.

Certifications

• Microsoft Certified: Azure Fundamentals (AZ-900) **Certified, 2023**
Microsoft • Cloud Concepts, Azure Architecture, Security, Governance & Compliance
